THERE IS NEED FOR PAGE AND POST BOOSTING

Boosted posts are ads you create from existing posts on your Facebook Page. Boosting a post can help you get more messages, video views, leads or calls. You may also reach new people who are likely interested in your Page or business, but don't currently follow you.

BY BOOSTING THE POSTS AND PAGES, THE FOLLOWING ARE ENVISIONED IMPACTS:

- Reach more of the right people. Boosting our social media posts would expand our audience beyond people who already like our Pages. With the built-in targeting options, we can reach the people who are most likely to be interested in what you offer.
- Create a basic Facebook ad in just a few minutes by choosing an existing post and selecting a few options (goal, call to action, audience settings and more). It all happens on one screen, and we can be up and running.
- Access to analytics. Boosting posts enhances access to analytics that show you how well the post performed. This helps us to learn what works best for the Facebook marketing goals, so we can refine the Social media strategy over time.
- Extend our Facebook reach to Instagram. When we boost a Facebook post, we can choose to have the content appear as a boosted post on Instagram as well. This is an easy way to reach even more potential new followers.

For the adverts to be active and running online, there is a financing is a financial implication. There is need to arrange for the same.
